NOTICE

This is to inform you that, Department of Zoology & Fisheries are conducting a Rally on "Open defecation free program" in Vatluru. For life science students on 08-02-2019. So we request all the life science students to attend without fail.

Principal
PRINCIPAL
Sir C.R.R. College for Women
ELURU

Objectives

- Open defecation can pollute the environment and can cause the health problems and diseases
- High levels of open defecation are linked to high child mortality, poor nutrition etc.
- Open defecation has become a classic example of a negative spillover.
- Poor economic condition and lack of proper awareness are the main culprits of open defecation and improper sanitation

OUTCOMES

- Students aware about hygiene conditions
- Students are able to understand the transmission of various diseases such as cholera and dysentery

A Rally program on open defecation

REPORT:

Open defecation is the human practice of defecating outside rather than in to a toilet. People may choose fields, bushes, forest, ditches, streets, canals or other open spaces for defecation. They do so either because they do not have a toilet readily accessible or due to traditional cultural practices. The practice is common where sanitation infrastructure and services are not available. A rally was conducted by III CBZ students in vatluru village on "Avoid defecation" on open grounds. 30 students participated in this rally. Students were divided into 3 groups and went to each and every home and delivered a lecture on avoiding defecation on open grounds. Awarared vatluru people to use toilets instead of open defecation. Students have prepared some placards and flexes and exposed to vatluru village. Students have awared vatluru villagers that open defecation can pollute the environment and cause health problems and diseases. Students have also awared about diarrhea.
