emophilia Day #SIR CR REDDY COLLEGE FOR WOMEN VATLURU ELURU

REPORT

As a part of Community service NSS and IQAC of Sir C R Reddy College for women and Indian Red Cross Society organized an Awareness program on the occasion of World Hemophilia day at Sir C R Reddy College on 9th April 2023.

Dance performance by Kumari Pallavi as an Inaugural and the youth members presented the reports of Hemophilia Vijayawada chapter 2022-2023 activity and it is followed by welcoming the guests and Lighting lamp by chief Guests.

Chief Guest of this program Dr. Nalini Parthasarathi delivers his speech to educate about Hemophilia. This program creates awareness for newly diagnosed families, as well as carrier families. Through this program, families gain information and resources on diagnosis, Management , treatment options and strategies to prevent Secondary conditions.

Dr. I. S Chaitanya kumar , AIIMS, Mangalagiri speaks about men and women with bleeding disorder. Willebrand disease (VWD) is a bleeding disorder that affects males and females equally. It is more common than hemophilia and can sometimes cause heavy bleeding. It is caused by a deficiency of von Willebrand factor (VWF), which is a type of protein that helps blood to clot. It does not cause serious problems, as the condition is mild and manageable. Most people and have symptoms such as easy bruising, frequent or long-lasting nosebleeds or bleeding from your gums. Women are more likely to experience symptoms and complications due to the increased risk of bleeding during menstruation, pregnancy and childbirth. It may also be hard to stop bleeding after an injury, dental procedure or surgery.

Dr. G. Vikram Kumar talks about modern treatments which reduce the risk of complications and disruptions to school, employment and family life for people with bleeding disorders.
