NUMBER SYSTEM

1. (a) **Natural Numbers** : The counting numbers 1, 2, 3, 4, 5, are called the natural numbers and their set is denoted by N.

$$N = \{1, 2, 3, 4, \dots\}$$

- (b) **Whole numbers** : The set of whole numbers is denoted by W.

$$W = \{0, 1, 2, 3, 4, \dots\}$$

- (c) **Integers** : All the natural numbers, zero and the negatives of natural numbers are called integers.

$$I = \{\dots, -3, -2, -1, 0, 1, 2, 3, \dots\}$$

- d) **Rational Numbers** : The numbers which can be expressed in the form $\frac{p}{q}$, where p and q are integers and $q \neq 0$ are called rational numbers and their set is denoted by Q.

e.g., $\frac{1}{2}, \frac{3}{4}, -\frac{1}{8}$, etc. are rational numbers.

- e) **Irrational Numbers** : The numbers which when expressed in decimal form are neither terminating nor repeating decimals are called irrational numbers.

e.g., $\sqrt{2}, \sqrt{3}, \pi, e$, etc. are irrational numbers.

- f) **Real Numbers** : All rational and irrational numbers together form the set of real numbers, denoted by R.

2. **Even and Odd Numbers** : The counting numbers divisible by 2 are called even numbers and not divisible by 2 are called odd numbers.

3. **Prime Numbers and Composite Numbers** : Prime numbers are the numbers greater than one which are either divisible by 1 or by itself. Eg. 2, 3, 5, 7, 11, 13, ...

Composite numbers are numbers greater than one which have atleast one factor, other than 1 or itself.

Eg. 4, 6, 9, 10, etc.

Note : 1 is neither prime nor composite.

4. **Tests of Divisibility** :

Divisible by 2 : A number is divisible by 2, if its unit digit 0, 2, 4, 6 or 8.

Divisible by 3 : A number is divisible by 3, if the sum of the digits of the number is divisible by 3.

Divisible by 4 : A number is divisible by 4, if the number formed by the last two digits is divisible by 4.

Divisible by 5 : A number is divisible by 5, if its unit's digit is either 5 or 0.

Divisible by 6 : A number is divisible by 6, if it is divisible by 2 and 3 simultaneously.

Divisible by 7 : If the last digit (unit's digit) of a number is multiplied by 2 and this product is subtracted from the number formed by remaining digits and the remainder so obtained is 7 or 0 (this operation may be repeated if necessary) then the number is divisible by 7.

Divisible by 8 : A number is divisible by 8, if the number formed by the last three digits is divisible by 8.

Divisible by 9 : A number is divisible by 9, if the sum of the digits of the number is divisible by 9.

Divisible by 10 : A number is divisible by 10, if its unit's digit is 0.

Divisible by 11 : A number is divisible by 11, if the difference of the sum of its digits on odd places and the sum of the digits in even places is either 0 or divisible by 11.

Divisible by 12 : A number divisible by 6, if it is divisible by 3 and 4 simultaneously.

Divisible by 13 : If the last digit (unit's digit) of a number is multiplied by 4 and this product is added to the number formed by remaining digits and the number so obtained is divisible by 13 (this operation may be repeated if necessary) then the number is divisible by 13.

Divisible by 14 : A number is divisible by 14, if it is divisible by 2 and 7 simultaneously.

Divisible by 15 : A number is divisible by 15, if it is divisible by 3 and 5 simultaneously.

Divisible by 16 : A number is divisible by 16, if it is divisible by 2 and 8 simultaneously.

Divisible by 17 : If the last-digit (unit's digit) of a number is multiplied by 5 and this product is subtracted from the number formed by the remaining digits of that number and the remainder so obtained is divisible by 17 (this operation may be repeated if necessary), then the number is divisible 17.

5. Specific Rules :

- i) If all three digits of a three digits number are same, the number is divisible by 3 and 37.
- ii) If all the size digits of a 6 digit number are same, the number is divisible by 3, 7, 11, 13 and 37.

6. Division Algorithm :

Dividend = (Divisor \times Quotient) + Remainder

- 7. Co-prime Numbers** : Two numbers are co-prime, if their G.C.D. is 1. For example, (2, 3), (3, 23), (5, 7), etc. are co-prime numbers.

- 8. Multiple** : Multiple of a number = the number \times a counting number.

Every number is a multiple of itself and 1.

Factor : When two or more numbers are multiplied, we get a product. Each of the numbers is called a factor of the product.

1 is a factor of every number and a number is a factor of itself.

- 9. Fundamental Arithmetical Operations** : The four fundamental (basic) operations of arithmetic are - addition, subtraction, multiplication and division. We use the sign '+' for addition, '-' for subtraction, ' \times ' for multiplication and ' \div ' for division.

- 10. Computation of Whole Numbers** : Here we consider the problems based on four fundamental operations (Addition, Subtraction, Multiplication and Division) in case of whole numbers {0, 1, 2, 3, 4,}

These operations on integers, fractions (simple and decimal) comes in the sequel. The other operations like power and root (underroot, etc.) will follow in the next headings.

EXAMPLES

1. Check the divisibility or 13580259 by 11.

Solution :

Sum of the digits at odd places

$$= 9 + 2 + 8 + 3 = 22$$

Sum of the digits at even places

$$= 5 + 0 + 5 + 1 = 11$$

Difference of sums = $22 - 11 = 11$, which is divisible by 11. So, 13580259 is divisible by 11.

2. Without actual division, show that :

(a) 42464 is divisible by 8.

(b) 24165 is divisible by 15.

Solution :

(a) The number formed by the last three digits of given number is 464 which is divisible by 8. \therefore Given number 42464 is divisible by 8.

(b) The prime factors of 15 are 3 and 5.

(i) Sum of the digits of given number is $2 + 4 + 1 + 6 + 5 = 18$, which is divisible by 3. So, the number is divisible by 3.

(ii) Since, there is 5 at the unit place of the number, so the number is divisible by 5.

Hence, the given number is divisible by 15.

Note : If a and b are two co-prime numbers and a number is divisible by a and b exactly, then the number will be divisible by ab.

3. If $34 \square 68$ is to be divisible by 9, then the value of missing digit \square should be :

(A) 6 (B) 5

(C) 4 (D) 3

(E) None of these

Solution :

The number will be divisible by 9 when the sum of its digits is divisible by 9.

$$\text{Here, } 3 + 4 + \square + 6 + 8 = \square + 21$$

\therefore If we replace 6 with \square , the sum becomes 27 which is divisible by 9.

Hence, the option (A) is correct.

4. On dividing 317029 by a certain number, the quotient and the remainder are 559 and 76 respectively. Find the divisor.

Solution :

We have,

$$\text{Divisor} = \frac{\text{Dividend} - \text{Remainder}}{\text{Quotient}}$$

$$= \frac{317029 - 76}{559} = 567$$

5. Find the greatest 5-digit number which is exactly divisible by 330.

Solution :

The greatest 5-digit number is 99999. Dividing 99999 by 330, the remainder is 9.

So, the required greatest number is $99999 - 9 = 99990$.

6. Find the smallest 6-digit number which is exactly divisible by 23.

Solution :

The smallest 6-digit number is 100000. Dividing 100000 by 23, the remainder is 19.

So, the required smallest number is $100000 + (23 - 19) = 100004$.

ANALOGIES

Introduction : 'ANALOGY' means 'SIMILARITY', having similar features, or 'ANALOGY' means 'CORRESPONDENCE'.

This test of reasoning tests the ability of a candidate to understand the relationship between two given objects and apply the same relationship to find that is asked in the question. The intellectual skill of the candidate is important to analyse the similarity between two or more objects. This test is meant to test a candidate's overall knowledge, power of reasoning and ability to think concisely and accurately. The relationship can be established in a number of ways.

PASSAGE-1

Directions (1-5) : Read the following passage and answer the questions as directed.

The basic idea of the Aadhaar Payment Bridge System (APBS), an offspring of the National Payments Corporation of India (NPCI), is that a person's Aadhaar number becomes her financial address. **(I)** provide multiple account details (say, her name, bank account number and IFSC code) to receive a bank transfer, she only has to provide her Aadhaar number.

Induction of a bank account into APBS involves two distinct steps, both of **(II)** be based on informed consent. First, the account must be "seeded" with the customer's Aadhaar number. Second, it must be connected to the NPCI mapper — a step known as "mapping". In cases of multiple accounts for the same person, the APBS automatically sends money to the latest-mapped account.

To understand the dangers of this "bridge", we must rewind to 2014, when the Jan Dhan Yojana (JDY) was launched. In the **frantic** drive that followed, millions of bank accounts were opened and seeded with Aadhaar in a haphazard manner, under relentless pressure from the Central government. Some JDY accounts certainly served a purpose, but many others were superfluous and created a confusing multiplicity of accounts. More importantly for our purpose, Aadhaar numbers were seeded into these accounts without proper verification.

Haphazard seeding continued well beyond 2014 because the government wanted to bring all direct benefit transfer (DBT) payments — pensions, scholarships, subsidies, MGNREGA wages, and so on — under the Aadhaar payments umbrella. Government departments started sending bulk lists of bank accounts and Aadhaar numbers to the banks for Aadhaar seeding. Meeting the seeding targets was the top priority and due verification, once again, **(III)**.

Thus, the groundwork required for APBS to work — reliable seeding of bank accounts with Aadhaar — had simply not been done when the APBS was rolled out. The seeding mess, it seems, was sought to be cleaned up by making "e-KYC" compulsory. This essentially means that account holders were required to go through biometric authentication to verify their Aadhaar number and identity information. To enforce e-KYC, many banks used the "ultimatum method": a deadline was set, and people's accounts were blocked when they missed the deadline.

Compulsory e-KYC became a nightmare for poor people, for a number of reasons: some did not know what they were supposed to do, others had problems of biometric authentication, others still struggled with inconsistencies between the Aadhaar database and the bank database. Among the worst victims were old-age pensioners. To this day, in Jharkhand, many pensioners are struggling to understand why their pension was discontinued after e-KYC was made compulsory.

1. As per the passage, why did the Compulsory e-KYC become miserable for poor people?

(I) Some poor people did not know what they were supposed to do.

(II) Some poor people had problems of biometric authentication.

(III) Some poor people struggled with inconsistencies between the Aadhaar database and the bank database

PASSAGE-2

Increased warming in the Indian Ocean and the resultant weakening of the Indian summer monsoon may come in the way of India's goal of leading the world's wind power generation. Analysing the available wind and atmospheric data from 1980-2016, researchers from Harvard University, U.S., and National Climate Center in Beijing, China, found the potential electricity production of windmills across India had decreased by about 13%. And this trend might continue. However, researchers in India have raised doubts about the results of the study. "The data used by the team does not **correlate** with the live data we have. We have started additional studies to validate these results and will publish the findings soon," says Dr. K. Balaraman, Director General, National Institute of Wind Energy, Chennai, under the Government's Ministry of New and Renewable Energy. In the paper published last December in Science Advances, the researchers showed a decline in electricity production in the States of Rajasthan, Maharashtra, Gujarat, and Karnataka. **(A) Not significant decline was seen in Tamil Nadu, which is located on the east coast and, thus, had different wind conditions during summer.**

"The government could concentrate on setting up more projects in this region [Tamil Nadu] as the lifetime of wind turbines is 20 to 30 years. We need to look at long-term goals," says Meng Gao, a postdoctoral fellow at the School of Engineering and Applied Sciences, Harvard University and the first author of the study. The researchers showed that 63% of the annual production of electricity from wind is **(B) -----** by winds in spring (March-May) and summer (June-August). Interestingly, they found a decrease in wind power during these months. This could be due to the weakening of the Indian summer monsoon during this period.

Summer winds in India are driven by the temperature contrast between the Indian subcontinent and the Indian Ocean, and the warming in the Indian Ocean reduced this contrast. Also, warming of the Equatorial Indian Ocean resulted in a decline in the wind speed. The Indian government has set a target of 60 GW of **cumulative** wind power capacity by 2022. The researchers say that this goal can

be (C)----- only if planners in India take these historical reconstructions into account while setting up wind power installations in the future. "Our findings can provide suggestions on where to build more wind turbines to minimise the influences of climate change," said Prof. Michael B. McElroy, from the School of Engineering and Applied Sciences, Harvard University and senior author of the study in a release.

1. According to the passage given above, what might come in India's goal of leading the world's wind power generation?

PASSAGE-3

The West Bengal Government's decision to open English sections in as many as 100 government and government aided Bengali-medium schools has caused euphoria among students, teachers and guardians. The policy English medium facilities from the primary to higher secondary levels. The objective is to stop the mass exodus of students to private English medium schools. Some express doubt about the efficacy of the policy; others are hopeful about the outcome of the action. Two changes will come from the introduction of English sections. First, English will replace Bengali as a medium of instructions. Second, teachers will find themselves in an ideal classroom situation (I).

But they are not enough to win the confidence of guardians. Both English

and Bengali sections will read or use books with the same content for all subjects. The difference lies only in the language or medium of instruction. Translations are not up to the mark. Both the subject and the language must be grasped **(II)**. **Another impediment is a woeful dearth of teachers who are qualified to teach in English.** Most teachers with Bengali medium background get scared at the idea of imparting instructions in English. Once they fathom the weight of the new responsibility, they will find teaching in English-medium sections a challenge. A few, too few, have the confidence to rise to the occasion.

Such being the case, the new sections will be in shambles. It is imperative for the government to open pure English-medium schools, rather than split the medium of instruction in each of the 100 schools. They should be raised to the status of model schools.

What will happen to the majority of schools that will not have English sections? It is a matter of **(III)**. A complete overhaul of the school education system is required. Teaching is the only profession without any provision for probation. In other professions, be it a government job or a corporate job, a probationary period is part of the service. But many **embark** on a teaching career at school level without the right mindset. Sensitising new recruits to the core aspects of teaching can give them a good start.

1. Which of the following statements is/are incorrect as per the passage above?
 - 1) Teaching is the only profession without any provision for probation.

Subject: Appreciation for Campus Recruitment Training Program

Dear Director,

I extend our sincere thanks to Sreedhar's CCE for conducting the "Campus Recruitment Training Program" at our institution for 15 days, with daily sessions of 2 hours, one in the morning and one in the evening, from 20-02-2023 to 09-03-2023. The program focused on enhancing our students' skills in arithmetic reasoning and verbal ability, and we are grateful for the valuable contribution of Sreedhar's CCE Eluru.

The resource persons from Sreedhar's CCE have proven to be an incredible team, demonstrating diligence and hard work throughout the training program. Their efforts have yielded positive results, and we appreciate the commitment they have shown.

We are delighted to witness a notable positive transformation in the discipline, regularity, and daily routines of our students after the completion of the 15-days program.. The shortcut learning methods introduced by Sreedhar's CCE have played a crucial role in improving our students' confidence levels, especially in preparation for written examinations related to competitive and campus placements.

I want to express our gratitude for your support, sir. Your work has had a tangible and positive impact, and we are confident that the skills imparted will benefit our students in their future endeavors. Thank you for dedicating your time and facilitating the program with innovative thoughts and enormous efforts.

Looking ahead, we express our interest in having future training programs conducted in our college for incoming batches. We believe that continued collaboration with Sreedhar's CCE will contribute significantly to the development of our students.

Thank you once again for your valuable contributions.

NUMBER SYSTEM

1. (a) **Natural Numbers** : The counting numbers 1, 2, 3, 4, 5, are called the natural numbers and their set is denoted by N.
 $N = \{1, 2, 3, 4, \dots\}$
- (b) **Whole numbers** : The set of whole numbers is denoted by W.
 $W = \{0, 1, 2, 3, 4, \dots\}$
- (c) **Integers** : All the natural numbers, zero and the negatives of natural numbers are called integers.
 $I = \{\dots, -3, -2, -1, 0, 1, 2, 3, \dots\}$
- (d) **Rational Numbers** : The numbers which can be expressed in the form $\frac{p}{q}$, where p and q are integers and $q \neq 0$ are called rational numbers and their set is denoted by Q.
 e.g., $\frac{1}{2}, \frac{3}{4}, -\frac{1}{8}$, etc. are rational numbers.
- (e) **Irrational Numbers** : The numbers which when expressed in decimal form are neither terminating nor repeating decimals are called irrational numbers.
 e.g., $\sqrt{2}, \sqrt{3}, \pi, e$, etc. are irrational numbers.
- (f) **Real Numbers** : All rational and irrational numbers together form the set of real numbers, denoted by R.
2. **Even and Odd Numbers** : The counting numbers divisible by 2 are called even numbers and not divisible by 2 are called odd numbers.
3. **Prime Numbers and Composite Numbers** :
 Prime numbers are the numbers greater than one which are either divisible by 1 or by itself.
 Eg. 2, 3, 5, 7, 11, 13, ...
 Composite numbers are numbers greater than one which have atleast one factor, other than 1 or itself.
 Eg. 4, 6, 9, 10, etc.
Note : 1 is neither prime nor composite.

4. Tests of Divisibility :

Divisible by 2 : A number is divisible by 2, if its unit digit 0, 2, 4, 6 or 8.

Divisible by 3 : A number is divisible by 3, if the sum of the digits of the number is divisible by 3.

Divisible by 4 : A number is divisible by 4, if the number formed by the last two digits is divisible by 4.

Divisible by 5 : A number is divisible by 5, if its unit's digit is either 5 or 0.

Divisible by 6 : A number is divisible by 6, if it is divisible by 2 and 3 simultaneously.

Divisible by 7 : If the last digit (unit's digit) of a number is multiplied by 2 and this product is subtracted from the number formed by remaining digits and the remainder so obtained is 7 or 0 (this operation may be repeated if necessary) then the number is divisible by 7.

Divisible by 8 : A number is divisible by 8, if the number formed by the last three digits is divisible by 8.

Divisible by 9 : A number is divisible by 9, if the sum of the digits of the number is divisible by 9.

Divisible by 10 : A number is divisible by 10, if its unit's digit is 0.

Divisible by 11 : A number is divisible by 11, if the difference of the sum of its digits on odd places and the sum of the digits in even places is either 0 or divisible by 11.

Divisible by 12 : A number divisible by 6, if it is divisible by 3 and 4 simultaneously.

Divisible by 13 : If the last digit (unit's digit) of a number is multiplied by 4 and this product is added to the number formed by remaining digits and the number so obtained is divisible by 13 (this operation may be repeated if necessary) then the number is divisible by 13.

Divisible by 14 : A number is divisible by 14, if it is divisible by 2 and 7 simultaneously.

Divisible by 15 : A number is divisible by 15, if it is divisible by 3 and 5 simultaneously.

Divisible by 16 : A number is divisible by 16, if it is divisible by 2 and 8 simultaneously.

Divisible by 17 : If the last-digit (unit's digit) of a number is multiplied by 5 and this product is subtracted from the number formed by the remaining digits of that number and the remainder so obtained is divisible by 17 (this operation may be repeated if necessary), then the number is divisible by 17.

5. Specific Rules :

i) If all three digits of a three digits number are same, the number is divisible by 3 and 37.

ii) If all the size digits of a 6 digit number are same, the number is divisible by 3, 7, 11, 13 and 37.

6. Division Algorithm :

Dividend = (Divisor \times Quotient) + Remainder

7. Co-prime Numbers : Two numbers are co-prime, if their G.C.D. is 1. For example, (2, 3), (3, 23), (5, 7), etc. are co-prime numbers.

8. Multiple : Multiple of a number = the number \times a counting number.

Every number is a multiple of itself and 1.

Factor : When two or more numbers are multiplied, we get a product. Each of the numbers is called a factor of the product.

1 is a factor of every number and a number is a factor of itself.

9. Fundamental Arithmetical Operations : The four fundamental (basic) operations of arithmetic are - addition, subtraction, multiplication and division. We use the sign '+' for addition, '-' for subtraction, ' \times ' for multiplication and ' \div ' for division.

10. Computation of Whole Numbers : Here we consider the problems based on four fundamental operations (Addition, Subtraction, Multiplication and Division) in case of whole numbers {0, 1, 2, 3, 4,}

These operations on integers, fractions (simple and decimal) comes in the sequel. The other operations like power and root (underroot, etc.) will follow in the next headings.

EXAMPLES

1. Check the divisibility of 13580259 by 11.

Solution :

Sum of the digits at odd places

$$= 9 + 2 + 8 + 3 = 22$$

Sum of the digits at even places

$$= 5 + 0 + 5 + 1 = 11$$

Difference of sums = $22 - 11 = 11$, which is divisible by 11. So, 13580259 is divisible by 11.

2. Without actual division, show that :

(a) 42464 is divisible by 8.

(b) 24165 is divisible by 15.

Solution :

(a) The number formed by the last three digits of given number is 464 which is divisible by 8. \therefore Given number 42464 is divisible by 8.

(b) The prime factors of 15 are 3 and 5.

(i) Sum of the digits of given number is $2 + 4 + 1 + 6 + 5 = 18$, which is divisible by 3. So, the number is divisible by 3.

(ii) Since, there is 5 at the unit place of the number, so the number is divisible by 5.

Hence, the given number is divisible by 15.

Note : If a and b are two co-prime numbers and a number is divisible by a and b exactly, then the number will be divisible by ab.

3. If $34 \square 68$ is to be divisible by 9, then the value of missing digit \square should be :

(A) 6 (B) 5

(C) 4 (D) 3

(E) None of these

Solution :

The number will be divisible by 9 when the sum of its digits is divisible by 9.

$$\text{Here, } 3 + 4 + \square + 6 + 8 = \square + 21$$

\therefore If we replace 6 with \square , the sum becomes 27 which is divisible by 9.

Hence, the option (A) is correct.

4. On dividing 317029 by a certain number, the quotient and the remainder are 559 and 76 respectively. Find the divisor.

Solution :

We have,

$$\text{Divisor} = \frac{\text{Dividend} - \text{Remainder}}{\text{Quotient}}$$

$$= \frac{317029 - 76}{559} = 567$$

5. Find the greatest 5-digit number which is exactly divisible by 330.

Solution :

The greatest 5-digit number is 99999. Dividing 99999 by 330, the remainder is 9.

So, the required greatest number is $99999 - 9 = 99990$.

6. Find the smallest 6-digit number which is exactly divisible by 23.

Solution :

The smallest 6-digit number is 100000. Dividing 100000 by 23, the remainder is 19.

So, the required smallest number is

$$100000 + (23 - 19) = 100004.$$

ANALOGIES

Introduction : 'ANALOGY' means 'SIMILARITY', having similar features, or 'ANALOGY' means 'CORRESPONDENCE'.

This test of reasoning tests the ability of a candidate to understand the relationship between two given objects and apply the same relationship to find that is asked in the question. The intellectual skill of the candidate is important to analyse the similarity between two or more objects. This test is meant to test a candidate's overall knowledge, power of reasoning and ability to think concisely and accurately. The relationship can be established in a number of ways.

1 - READING COMPREHENSION

PASSAGE-1

Directions (1-5) : Read the following passage and answer the questions as directed.

The basic idea of the Aadhaar Payment Bridge System (APBS), an offspring of the National Payments Corporation of India (NPCI), is that a person's Aadhaar number becomes her financial address. **(I)** provide multiple account details (say, her name, bank account number and IFSC code) to receive a bank transfer, she only has to provide her Aadhaar number.

Induction of a bank account into APBS involves two distinct steps, both of **(II)** be based on informed consent. First, the account must be "seeded" with the customer's Aadhaar number. Second, it must be connected to the NPCI mapper — a step known as "mapping". In cases of multiple accounts for the same person, the APBS automatically sends money to the latest-mapped account.

To understand the dangers of this "bridge", we must rewind to 2014, when the Jan Dhan Yojana (JDY) was launched. In the **frantic** drive that followed, millions of bank accounts were opened and seeded with Aadhaar in a haphazard manner, under relentless pressure from the Central government. Some JDY accounts certainly served a purpose, but many others were superfluous and created a confusing multiplicity of accounts. More importantly for our purpose, Aadhaar numbers were seeded into these accounts without proper verification.

Haphazard seeding continued well beyond 2014 because the government wanted to bring all direct benefit transfer (DBT) payments — pensions, scholarships, subsidies, MGNREGA wages, and so on — under the Aadhaar payments umbrella. Government departments started sending bulk lists of bank accounts and Aadhaar numbers to the banks for Aadhaar seeding. Meeting the seeding targets was the top priority and due verification, once again, **(III)**.

Thus, the groundwork required for APBS to work — reliable seeding of bank accounts with Aadhaar — had simply not been done when the APBS was rolled out. The seeding mess, it seems, was sought to be cleaned up by making "e-KYC" compulsory. This essentially means that account holders were required to go through biometric authentication to verify their Aadhaar number and identity information. To enforce e-KYC, many banks used the "ultimatum method": a deadline was set, and people's accounts were blocked when they missed the deadline.

Compulsory e-KYC became a nightmare for poor people, for a number of reasons: some did not know what they were supposed to do, others had problems of biometric authentication, others still struggled with inconsistencies between the Aadhaar database and the bank database. Among the worst victims were old-age pensioners. To this day, in Jharkhand, many pensioners are struggling to understand why their pension was discontinued after e-KYC was made compulsory.

1. As per the passage, why did the Compulsory e-KYC become miserable for poor people?

(I) Some poor people did not know what they were supposed to do.

(II) Some poor people had problems of biometric authentication.

(III) Some poor people struggled with inconsistencies between the Aadhaar database and the bank database

PASSAGE-2

Increased warming in the Indian Ocean and the resultant weakening of the Indian summer monsoon may come in the way of India's goal of leading the world's wind power generation. Analysing the available wind and atmospheric data from 1980-2016, researchers from Harvard University, U.S., and National Climate Center in Beijing, China, found the potential electricity production of windmills across India had decreased by about 13%. And this trend might continue. However, researchers in India have raised doubts about the results of the study. "The data used by the team does not **correlate** with the live data we have. We have started additional studies to validate these results and will publish the findings soon," says Dr. K. Balaraman, Director General, National Institute of Wind Energy, Chennai, under the Government's Ministry of New and Renewable Energy. In the paper published last December in Science Advances, the researchers showed a decline in electricity production in the States of Rajasthan, Maharashtra, Gujarat, and Karnataka. **(A) Not significant decline was seen in Tamil Nadu, which is located on the east coast and, thus, had different wind conditions during summer.**

"The government could concentrate on setting up more projects in this region [Tamil Nadu] as the lifetime of wind turbines is 20 to 30 years. We need to look at long-term goals," says Meng Gao, a postdoctoral fellow at the School of Engineering and Applied Sciences, Harvard University and the first author of the study. The researchers showed that 63% of the annual production of electricity from wind is **(B) -----** by winds in spring (March-May) and summer (June-August). Interestingly, they found a decrease in wind power during these months. This could be due to the weakening of the Indian summer monsoon during this period.

Summer winds in India are driven by the temperature contrast between the Indian subcontinent and the Indian Ocean, and the warming in the Indian Ocean reduced this contrast. Also, warming of the Equatorial Indian Ocean resulted in a decline in the wind speed. The Indian government has set a target of 60 GW of **cumulative** wind power capacity by 2022. The researchers say that this goal can

be (C)----- only if planners in India take these historical reconstructions into account while setting up wind power installations in the future. "Our findings can provide suggestions on where to build more wind turbines to minimise the influences of climate change," said Prof. Michael B. McElroy, from the School of Engineering and Applied Sciences, Harvard University and senior author of the study in a release.

PASSAGE-3

The West Bengal Government's decision to open English sections in as many as 100 government and government aided Bengali-medium schools has caused euphoria among students, teachers and guardians. The policy English medium facilities from the primary to higher secondary levels. The objective is to stop the mass exodus of students to private English medium schools. Some express doubt about the efficacy of the policy; others are hopeful about the outcome of the action. Two changes will come from the introduction of English sections. First, English will replace Bengali as a medium of instructions. Second, teachers will find themselves in an ideal classroom situation (I).

But they are not enough to win the confidence of guardians. Both English

and Bengali sections will read or use books with the same content for all subjects. The difference lies only in the language or medium of instruction. Translations are not up to the mark. Both the subject and the language must be grasped (II). **Another impediment is a woeful dearth of teachers who are qualified to teach in English.** Most teachers with Bengali medium background get scared at the idea of imparting instructions in English. Once they fathom the weight of the new responsibility, they will find teaching in English-medium sections a challenge. A few, too few, have the confidence to rise to the occasion.

Such being the case, the new sections will be in shambles. It is imperative for the government to open pure English-medium schools, rather than split the medium of instruction in each of the 100 schools. They should be raised to the status of model schools.

What will happen to the majority of schools that will not have English sections? It is a matter of (III). A complete overhaul of the school education system is required. Teaching is the only profession without any provision for probation. In other professions, be it a government job or a corporate job, a probationary period is part of the service. But many **embark** on a teaching career at school level without the right mindset. Sensitising new recruits to the core aspects of teaching can give them a good start.

1. Which of the following statements is/are incorrect as per the passage above?
 - 1) Teaching is the only profession without any provision for probation.
 - 2) The objective of West Bengal Government's decision to open English sections in as many as 100 government and government aided Bengali-medium schools is to stop the mass arrival of students to government English medium schools.

Subject: Appreciation for Campus Recruitment Training Program

Dear Director,

I extend our sincere thanks to Sreedhar's CCE for conducting the "Campus Recruitment Training Program" at our institution for 10 days, with daily sessions of 2 hours, one in the morning and one in the evening, from 28-12-2021 to 7-1-2022. The program focused on enhancing our students' skills in arithmetic reasoning and verbal ability, and we are grateful for the valuable contribution of Sreedhar's CCE Eluru.

The resource persons from Sreedhar's CCE have proven to be an incredible team, demonstrating diligence and hard work throughout the training program. Their efforts have yielded positive results, and we appreciate the commitment they have shown.

We are delighted to witness a notable positive transformation in the discipline, regularity, and daily routines of our students after the completion of the 10-day program.. The shortcut learning methods introduced by Sreedhar's CCE have played a crucial role in improving our students' confidence levels, especially in preparation for written examinations related to competitive and campus placements.

I want to express our gratitude for your support, sir. Your work has had a tangible and positive impact, and we are confident that the skills imparted will benefit our students in their future endeavors. Thank you for dedicating your time and facilitating the program with innovative thoughts and enormous efforts.

Looking ahead, we express our interest in having future training programs conducted in our college for incoming batches. We believe that continued collaboration with Sreedhar's CCE will contribute significantly to the development of our students.

Thank you once again for your valuable contributions.

Good Morning /Good After-noon /Good Evening

My name is Pankaj from Delhi. I am pursuing my B-Tech in stream of computer science from C V R Engineering College. I have completed CHSC from BB College and my SSC from Delhi High school with aggregate 73%.

We are five in my family. My father is a private employee and my mother is a homemaker. I have two siblings.

About my achievements, I never made any achievements at state level. But in my schooling I got certificate in singing level competition. In college I got NSS certificate which I participated as volunteer in my 1st year of engineering.

My strengths are hard worker, self motivating and dedicated towards my work. And also I'm a good learner as well as a teacher.

My hobbies are making crafts, painting, surfing net.

My short term goal is to get placed in a well reputed company.

My long term goal is to be become a CEO of any MNC company.

Role Play

Role plays are an excellent way of getting students to practise their English. They simulate real life situations and allow them to act out what they would do in a real situation.

There are two ways a role play can go: scripted and non-scripted. With a scripted role play, the teacher might use an example in a text book. Below some role plays used to enhance students' communication skills.

1. Checking in at an airport
2. Asking for and paying the bill
3. Telephone Conversation

CHECKING IN AT AN AIRPORT

- Quite often these days check in happens on-line
- Sometimes you will need to check in at an airline counter, especially if you are taking more than hand luggage
- Airline officials may be under pressure so it's important to speak to them politely
- Travelling can sometimes be stressful and affect the way we interact with other people

USEFUL LANGUAGE AND REFLECTION

Is the flight leaving on time?

Apart from asking at check-in what are other ways you can find this information at an airport?

The flight is delayed

Coding-Decoding

Coding is a method of transmitting a message between the sender and the receiver that no third person can understand it. The coding and decoding one's ability of deciphering the rule and breaking the code to decipher the message will be tested to know.

How to solve Coding-Decoding Questions:

- 1) Observe alphabets or numbers given in the code keenly.
- 2) Find the sequence it follows whether it is ascending or descending.
- 3) Detect the rule in which the alphabets/numbers/words follow.
- 4) Fill the appropriate letter/number/word in the blank given.

The Coding and Decoding is classified into Six types according to the on what way it is doing. They are

1. Letter Coding
2. Number Coding
3. Mixed Coding
4. Mixed Number Coding
5. Decoding
6. Symbols Coding

1. Letter Coding -

A particular letter stands for another letter in letter coding.

Eg: If COURSE is coded as FRXUVH, how is RACE coded in that code?

- (1) HFDU
- (2) UCFH
- (3) UDFH
- (4) UDHF
- (5) UDFG

In the given code, each letter is moved three steps forward than the corresponding letter in the word. So R is coded as U, A as D, C as F, E as H. Hence (3) is the answer.

Learn this table by heart. This is the only shortcut or trick to solve coding - decoding questions fast in Bank exams.

Alphabets	Alphabetical Order	Reverse Order
A	1	26
B	2	25
C	3	24
D	4	23
E	5	22
F	6	21
G	7	20
H	8	19
I	9	18
J	10	17
K	11	16
L	12	15

M	13	14
N	14	13
O	15	12
P	16	11
Q	17	10
R	18	9
S	19	8
T	20	7
U	21	6
V	22	5
W	23	4
X	24	3
Y	25	2
Z	26	1

2. Number Coding -

In these questions, either numerical code values are assigned to a word or alphabetical code values are assigned to numbers. The candidate is required to analyse the code as per directions.

Case I: When numerical values are assigned to words.

Eg: If in a certain code ROPE is coded as 6821, CHAIR is coded as 73456 what will be the code for CRAPE?

- (1) 73456
- (2) 76421
- (3) 77246
- (4) 77123
- (5) None of these

Clearly, in the given code, the alphabets are coded as follows.

R	O	P	E	C	H	A	I
6	8	2	1	7	3	4	5

So CRAPE is coded as 76421, So the answer is (2)

Case II: When alphabetical code values are assigned to the numbers.

Eg: In a certain code 3456 is coded as ROPE & 15546 is coded as APPLE. Then how is 54613 coded?

- (1) RPPEO
- (2) ROPEA
- (3) POEAR
- (4) PAREO
- (5) None of these

Clearly in the given figures, the numbers are coded as follows.

3	4	5	6	1	4
R	O	P	E	A	L

So 54613 is coded as POEAR. The answer is (3)

3. Mixed Coding -

In this type of question, three or four complete messages are given in the coded language and the code for a particular word is asked.

To analyse such codes, any two messages bearing the common word are picked up. The common code word will mean that word. Proceeding similarly by picking up all possible combinations of two messages the entire message can be analysed.

Eg. If tee see pee means drink fruit juice, see kee lee means juice is sweet, and lee ree mee means he is intelligent, which word in that language means sweet?

- (1) see
- (2) kee
- (3) lee
- (4) pee
- (5) tee

In the first and the second statements the common word is juice and the common code word is see. So see means juice. In the second and the third statements, the common word is 'is' and the common code is lee. So lee means is. Thus in the second statement, the remaining word sweet is coded as kee. Hence the answer is (2).

4. Mixed Number Coding -

In this type of questions, three or four complete messages are given in the coded language and the code number for a particular word is asked.

Eg. If in a certain code language, 851 means good sweet fruit, 783 means good red rose and 341 means rose and fruit which of the following digits stands for sweet in that language?

- (1) 8
- (2) 5
- (3) 1
- (4) 3
- (5) None of these

In the first and the second statements, the common code digit is 8 and the common word is good. So 8 stands for good. In the first and the third statements, the common code digit is 1 and the common word is fruit. So 1 stands for fruit. Therefore in the first statement, 5 stands for sweet. Hence the answer is (2).

5. Decoding -

In these questions, artificial or code values are assigned to a word or a group of words and the candidate is required to find out the original words.

Eg. If in a certain language FLOWER is written as EKNVDQ, what will be written as GNTRD?

- (1) HECUS
- (2) HOUES
- (3) HUOSE
- (4) HOUSE
- (5) None of these

Each letter of the word is one step ahead of the corresponding letter of the code.

EKNVDQ GNTRD

F L O W E R H O U S E

Thus HOUSE is written as GNTRD, So the answer is (4)

6. Symbols Coding -

This is a kind of coding recently included in the Reasoning section. In this type of questions either alphabetical code values are assigned to symbols or symbols are assigned to alphabets. The candidate is required to analyse the code as per direction.

Eg. 1. In a certain code 'TOME' is written as '@ \$ * ?' and ARE is written as '+ £ ?'. How can 'REMOTE' be written in that code?

- (1) £ ? * \$ @ ?
- (2) @ ? * \$ @ ?
- (3) £ ? * \$ @ ?
- (4) Cannot be determined
- (5) None of these

Sol: From the data we have

T - @
O - \$
M - *
E - ?
A - +
R - £
E - ?

Hence REMOTE is coded as £ ? * \$ @ ? So (3) is the answer.

Practice questions:

- 1) 'ZYXW' as coded as 'ABCD' then 'STUV' is coded as.....
- 2) 'bod' is coded as 'def' then 'True' is coded as.....
- 3) 'Hyderabad' is coded as 'Iuducuzc' then 'Chennai' is coded as.....
- 4) Apple is coded as 25563, Rang is coded as 7148. Then purple is coded as
- 5) In a language A is coded as 1, B is coded as 2, then FACE is coded as
- 6) PUSH is coded as 1234, ROUGH is coded as 65274. Then SOUP is coded as
- 7) 'book' is coded as 'pencil', 'pencil' is coded as 'mirror', 'mirror' is coded as 'book'. Then what is useful to write on a paper?
- 8) 'man' is coded as 'woman', woman is coded as 'girl', 'girl' is coded as 'boy', 'boy' is coded as 'worker' then 6 years female is known as?
- 9) 'Red' are 'blues', 'blues' are 'whites', 'whites' are 'yellows', 'yellows' are 'oranges', 'oranges' are 'pinks', then what is the colour of the sky?

Role Play

Role plays are an excellent way of getting students to practise their English. They simulate real life situations and allow them to act out what they would do in a real situation.

There are two ways a role play can go: scripted and non-scripted. With a scripted role play, the teacher might use an example in a text book. Below some role plays used to enhance students' communication skills.

1. Checking in at an airport
2. Asking for and paying the bill
3. Telephone Conversation

CHECKING IN AT AN AIRPORT

- Quite often these days check in happens on-line
- Sometimes you will need to check in at an airline counter, especially if you are taking more than hand luggage
- Airline officials may be under pressure so it's important to speak to them politely
- Travelling can sometimes be stressful and affect the way we interact with other people

USEFUL LANGUAGE AND REFLECTION

Is the flight leaving on time?

Apart from asking at check-in what are other ways you can find this information at an airport?

The flight is delayed

Coding-Decoding

Coding is a method of transmitting a message between the sender and the receiver that no third person can understand it. The coding and decoding one's ability of deciphering the rule and breaking the code to decipher the message will be tested to know.

How to solve Coding-Decoding Questions:

- 1) Observe alphabets or numbers given in the code keenly.
- 2) Find the sequence it follows whether it is ascending or descending.
- 3) Detect the rule in which the alphabets/numbers/words follow.
- 4) Fill the appropriate letter/number/word in the blank given.

The Coding and Decoding is classified into Six types according to the on what way it is doing. They are

1. Letter Coding
2. Number Coding
3. Mixed Coding
4. Mixed Number Coding
5. Decoding
6. Symbols Coding

1. Letter Coding -

A particular letter stands for another letter in letter coding.

Eg: If COURSE is coded as FRXUVH, how is RACE coded in that code?

- (1) HFDU
- (2) UCFH
- (3) UDFH
- (4) UDFH
- (5) UDFG

In the given code, each letter is moved three steps forward than the corresponding letter in the word. So R is coded as U, A as D, C as F, E as H. Hence (3) is the answer.

Learn this table by heart. This is the only shortcut or trick to solve coding - decoding questions fast in Bank exams.

Alphabets	Alphabetical Order	Reverse Order
A	1	26
B	2	25
C	3	24
D	4	23
E	5	22
F	6	21
G	7	20
H	8	19
I	9	18
J	10	17
K	11	16
L	12	15

M	13	14
N	14	13
O	15	12
P	16	11
Q	17	10
R	18	9
S	19	8
T	20	7
U	21	6
V	22	5
W	23	4
X	24	3
Y	25	2
Z	26	1

2. Number Coding -

In these questions, either numerical code values are assigned to a word or alphabetical code values are assigned to numbers. The candidate is required to analyse the code as per directions.

Case I: When numerical values are assigned to words.

Eg: If in a certain code ROPE is coded as 6821, CHAIR is coded as 73456 what will be the code for CRAPE?

- (1) 73456
- (2) 76421
- (3) 77246
- (4) 77123
- (5) None of these

Clearly, in the given code, the alphabets are coded as follows.

R	O	P	E	C	H	A	I
6	8	2	1	7	3	4	5

So CRAPE is coded as 76421, So the answer is (2)

Case II: When alphabetical code values are assigned to the numbers.

Eg: In a certain code 3456 is coded as ROPE & 15546 is coded as APPLE. Then how is 54613 coded?

- (1) RPPEO
- (2) ROPEA
- (3) POEAR
- (4) PAREO
- (5) None of these

Clearly in the given figures, the numbers are coded as follows.

3	4	5	6	1	4
R	O	P	E	A	L

So 54613 is coded as POEAR. The answer is (3)

3. Mixed Coding -

In this type of question, three or four complete messages are given in the coded language and the code for a particular word is asked.

To analyse such codes, any two messages bearing the common word are picked up. The common code word will mean that word. Proceeding similarly by picking up all possible combinations of two messages the entire message can be analysed.

Eg. If tee see pee means drink fruit juice, see kee lee means juice is sweet, and lee see mee means he is intelligent, which word in that language means sweet?

- (1) see
- (2) kee
- (3) lee
- (4) pee
- (5) tee

In the first and the second statements the common word is juice and the common code word is see. So see means juice. In the second and the third statements, the common word is 'is' and the common code is lee. So lee means is. Thus in the second statement, the remaining word sweet is coded as kee. Hence the answer is (2).

4. Mixed Number Coding -

In this type of questions, three or four complete messages are given in the coded language and the code number for a particular word is asked.

Eg. If in a certain code language, 851 means good sweet fruit, 783 means good red rose and 341 means rose and fruit which of the following digits stands for sweet in that language?

- (1) 8
- (2) 5
- (3) 1
- (4) 3
- (5) None of these

In the first and the second statements, the common code digit is 8 and the common word is good. So 8 stands for good. In the first and the third statements, the common code digit is 1 and the common word is fruit. So 1 stands for fruit. Therefore in the first statement, 5 stands for sweet. Hence the answer is (2).

5. Decoding -

In these questions, artificial or code values are assigned to a word or a group of words and the candidate is required to find out the original words.

Eg. If in a certain language FLOWER is written as EKNVDQ, what will be written as GNTRD?

- (1) HEOUS
- (2) HOUES
- (3) HUOSE
- (4) HOUSE
- (5) None of these

Each letter of the word is one step ahead of the corresponding letter of the code.

EKNVDQ GNTRD

F L O W E R H O U S E

Thus HOUSE is written as GNTRD, So the answer is (4)

6. Symbols Coding -

This is a kind of coding recently included in the Reasoning section. In this type of questions either alphabetical code values are assigned to symbols or symbols are assigned to alphabets. The candidate is required to analyse the code as per direction.

Eg. 1. In a certain code 'TOME' is written as '@ \$ * ?' and 'ARE' is written as '* \$?'. How can 'REMOTE' be written in that code?

- (1) \$? * \$ @ ?
- (2) @ ? * \$ @ ?
- (3) \$? * \$ @ ?
- (4) Cannot be determined
- (5) None of these

Sol: From the data we have

T - @

O - \$

M - *

E - ?

A - *

R - \$

E - ?

Hence REMOTE is coded as \$? * \$ @ ? So (3) is the answer.

Practice questions:

- 1) 'ZYXW' as coded as 'ABCD' then 'STUV' is coded as.....
- 2) 'bod' is coded as 'def' then 'True' is coded as.....
- 3) 'Hyderabad' is coded as 'bvdokozar' then 'Chennai' is coded as.....
- 4) Apple is coded as 25563, Ring is coded as 7148. Then purple is coded as
- 5) In a language A is coded as 1, B is coded as 2, then FACE is coded as
- 6) PUSH is coded as 1234, ROUGH is coded as 65274. Then SOUP is coded as
- 7) 'book' is coded as 'pencil', 'pencil' is coded as 'mirror', 'mirror' is coded as 'book'. Then what is useful to write on a paper?
- 8) 'man' is coded as 'woman', woman is coded as 'girl', 'girl' is coded as 'boy', 'boy' is coded as 'worker' then 6 years female is known as?
- 9) 'Red' are 'blues', 'blues' are 'whites', 'whites' are 'yellows', 'yellows' are 'oranges', 'oranges' are 'pinks', then what is the colour of the sky?

Coding-Decoding

Coding is a method of transmitting a message between the sender and the receiver that no third person can understand it. The coding and decoding one's ability of deciphering the rule and breaking the code to decipher the message will be tested to know.

How to solve Coding-Decoding Questions:

- 1) Observe alphabets or numbers given in the code keenly.
- 2) Find the sequence it follows whether it is ascending or descending.
- 3) Detect the rule in which the alphabets/numbers/words follow.
- 4) Fill the appropriate letter/number/word in the blank given.

The Coding and Decoding is classified into Six types according to the on what way it is doing. They are

1. Letter Coding
2. Number Coding
3. Mixed Coding
4. Mixed Number Coding
5. Decoding
6. Symbols Coding

1. Letter Coding -

A particular letter stands for another letter in letter coding.

Eg: If COURSE is coded as FRXUVE, how is RACE coded in that code?

- (1) HFDU
- (2) UCFH
- (3) UDFH
- (4) UDHF
- (5) UDFG

In the given code, each letter is moved three steps forward than the corresponding letter in the word. So R is coded as U, A as D, C as F, E as H. Hence (3) is the answer.

Learn this table by heart. This is the only shortcut or trick to solve coding - decoding questions fast in Bank exams.

Alphabets	Alphabetical Order	Reverse Order
A	1	26
B	2	25
C	3	24
D	4	23
E	5	22
F	6	21
G	7	20
H	8	19
I	9	18
J	10	17
K	11	16
L	12	15

M	13	14
N	14	13
O	15	12
P	16	11
Q	17	10
R	18	9
S	19	8
T	20	7
U	21	6
V	22	5
W	23	4
X	24	3
Y	25	2
Z	26	1

2. Number Coding -

In these questions, either numerical code values are assigned to a word or alphabetical code values are assigned to numbers. The candidate is required to analyse the code as per directions.

Case I: When numerical values are assigned to words.

Eg: If in a certain code ROPE is coded as 6821, CHAIR is coded as 73456 what will be the code for CRAPE?

- (1) 73456
- (2) 76421
- (3) 77246
- (4) 77123
- (5) None of these

Clearly, in the given code, the alphabets are coded as follows.

R	O	P	E	C	H	A	I
6	8	2	1	7	3	4	5

So CRAPE is coded as 76421. So the answer is (2)

Case II: When alphabetical code values are assigned to the numbers.

Eg: In a certain code 3456 is coded as ROPE & 15546 is coded as APPLE. Then how is 54613 coded?

- (1) RPPEO
- (2) ROPEA
- (3) POEAR
- (4) PAREO
- (5) None of these

Clearly in the given figures, the numbers are coded as follows.

3	4	5	6	1	4
R	O	P	E	A	L

So 54613 is coded as POEAR. The answer is (3)

3. Mixed Coding -

In this type of question, three or four complete messages are given in the coded language and the code for a particular word is asked.

To analyse such codes, any two messages bearing the common word are picked up. The common code word will mean that word. Proceeding similarly by picking up all possible combinations of two messages the entire message can be analysed.

Eg. If tee see pee means drink fruit juice, see kee lee means juice is sweet, and lee ree mee means he is intelligent, which word in that language means sweet?

- (1) see
- (2) kee
- (3) lee
- (4) pee
- (5) tee

In the first and the second statements the common word is juice and the common code word is see. So see means juice. In the second and the third statements, the common word is 'is' and the common code is lee. So lee means is. Thus in the second statement, the remaining word sweet is coded as kee. Hence the answer is (2).

4. Mixed Number Coding -

In this type of questions, three or four complete messages are given in the coded language and the code number for a particular word is asked.

Eg. If in a certain code language, 851 means good sweet fruit, 783 means good red rose and 341 means rose and fruit which of the following digits stands for sweet in that language?

- (1) 8
- (2) 5
- (3) 1
- (4) 3
- (5) None of these

In the first and the second statements, the common code digit is 8 and the common word is good. So 8 stands for good. In the first and the third statements, the common code digit is 1 and the common word is fruit. So 1 stands for fruit. Therefore in the first statement, 5 stands for sweet. Hence the answer is (2).

5. Decoding -

In these questions, artificial or code values are assigned to a word or a group of words and the candidate is required to find out the original words.

Eg. If in a certain language FLOWER is written as EKNVDQ, what will be written as GNTRD?

- (1) HEOUJS
- (2) HOUJES
- (3) HUOSE
- (4) HOUSE
- (5) None of these

Each letter of the word is one step ahead of the corresponding letter of the code.

EKNVDQ GNTRD

F L O W E R H O U S E

Thus HOUSE is written as GNTRD, So the answer is (4)

6. Symbols Coding -

This is a kind of coding recently included in the Reasoning section. In this type of questions either alphabetical code values are assigned to symbols or symbols are assigned to alphabets. The candidate is required to analyse the code as per direction.

Eg. 1. In a certain code 'TOME' is written as '@ \$ * ?' and ARE is written as '+ £ ?' How can 'REMOTE' be written in that code?

- (1) £ ? + \$ @ ?
- (2) @ ? * \$ @ ?
- (3) £ ? * \$ @ ?
- (4) Cannot be determined
- (5) None of these

Sol. From the data we have

T - @

O - \$

M - *

E - ?

A - +

R - £

E - ?

Hence REMOTE is coded as £ ? * \$ @ ? So (3) is the answer.

Practice questions:

- 1) 'ZYXW' as coded as 'ABCD' then 'STUV' is coded as.....
- 2) 'bod' is coded as 'def' then 'Tnat' is coded as.....
- 3) 'Hyderabad' is coded as 'haidrabad' then 'Chennai' is coded as.....
- 4) Apple is coded as 25563, Rung is coded as 7148. Then purple is coded as
- 5) In a language A is coded as 1, B is coded as 2, then FACE is coded as
- 6) PUSH is coded as 1234, ROUGH is coded as 65274. Then SOUP is coded as
- 7) 'book' is coded as 'pencil', 'pencil' is coded as 'mirror', 'mirror' is coded as 'book'. Then what is useful to write on a paper?
- 8) 'man' is coded as 'woman', woman is coded as 'girl', 'girl' is coded as 'boy', 'boy' is coded as 'worker' then 6 years female is known as?
- 9) 'Red' are 'blues', 'blues' are 'whites', 'whites' are 'yellows', 'yellows' are 'oranges', 'oranges' are 'pinks', then what is the colour of the sky?
