DEPARTMENT OF ZOOLOGY & FISHERIES

CAMPUS BIRD COUNT

16th to 19th February, 2024

We are excited to announce that the department of zoology and fisheries has organized a campus bird count ,which is part of great backyard bird count,from Feb 16th to February 19th 2024 .this event is a wonderful opportunity for our first and second year life science students,as well as four of our zoology and fisheries department lecturers,to come together and carry outbird surveys with in our campus.

We believe that our students will immensely benefitfrom this event,as they will be able to observe and identify various bird species,learn about their habitats and behavior, and enhance their field survey skills. Additionally, we have extended our invitation to the students of C.R.Reddy public school,who will also have the chance to participate in our Campus Bird Count and learn about the importance of bird conservation and biodiversity.

We hope that this event will not only be a fun and interactive learning experience for everyone involved but also contribute to the larger cause of bird conservation and environmental awareness.
